PAGE

Vapour–Liquid Equilibria of C_7-Hydrocarbon–Furfural Systems. F. H. Garner, O.B.E. and R. T. W. Hall . . . 1

An Appraisal of the High Pressure Oxidation Method for Testing Transformer Oil. J. M. Ward . . . 29

Higher Ketones as Dewaxing Solvents. J. L. Tiedje and D. M. Macleod . . . 37

The Application of Turbogrid Trays in the Petroleum Industry. G. J. van den Berg . . . 45

The Testing of "L.P.G." and Similar Hydrocarbon Gases—Some Notes on Procedures Currently Used in the U.K. The Petroleum Gases Panel of the Institute of Petroleum . . . 54

A Rapid Method for the Determination of Non-hydrocarbon Gases in Commercial Liquid Fuel Gas. A. E. Heron . . . 63

Obituary: **F. G. Rappoport** . . . 66

Surface Failure in Gears. Correspondence . . . 67

The Platforming Process. Gustav Egloff . . . 69

The Chromatographic Analysis of Hydrocarbon Mixtures. B. W. Bradford, D. Harvey, and D. E. Chalkley . . . 80

Correlation Between Equilibrium Flash Vaporization and ASTM Distillation Data of Petroleum Mixtures. J. C. Chu and E. J. Staffel . . . 92

Obituary: **M. A. Ockenden** . . . 100

Design and Operation of a Fluid Catalyst Pilot Plant for Fischer–Tropsch Synthesis. C. C. Hall and A. H. Taylor . . . 101

The Barrackpore–Wilson Oilfield of Trinidad. G. E. Higgins . . . 125

Obituaries: **G. M. Lees** . . . 148

S. T. Minchin . . . 149

Diesel Fuel Diluent—IP 22/53 . . . 150

Insurance in the Oil Industry. A. T. Wright . . . 151

The Structure of Lubricating Greases under the Light Microscope in Relation to their Performance. J. F. Hutton, J. B. Matthews, and N. A. Scarlett . . . 163

The Influence of Vanadium Pentoxide on the High-temperature Scaling of Heat-resisting Alloys. W. Betteridge, K. Sachs, and H. Lewis . . . 170

Carbon Residue—Conradson or Ramsbottom?—Correspondence . . . 181

Corrections to IP Standard Methods . . . 182

Fourth Cadman Memorial Lecture. C. A. P. Southwell, C.B.E., M.C. . . . 183

Applicational Research in the Oil Industry. C. G. Williams . . . 192

Trends in Early Insulating Oil Specifications. E. A. Evans . . . 203

A Laboratory Method of Evaluating Streaming Potentials across Mud Sheaths. N. C. Sen Gupta and C. G. Banerjee . . . 207

Isomerization of Mineral Oils with Hydrogenation Catalysts. C. Boelhouwer and H. I. Waterman . . . 211

Obituaries: **Sir Andrew Agnew, C.B.E.** . . . 215

Dr Franz Kind . . . 215

The Modern Planning of Regional Surveys for Petroleum. P. Leicester . . . 217

A Study of the Flow Properties of Residual Fuel Oils Using Electrical Conductivity Methods. G. C. Ackroyd and A. G. Lowe . . . 229

Hydrocarbon Research Group Report for 1954 . . . 235

CONTENTS

PAGE

Annual Report of Council for 1954 236

Forty-second Annual General Meeting 247

The Viscosity of Liquid Hydrocarbons. L. Grunberg 249

Desulphurization of Gas Oils by Catalytic Hydrogenation. W. C. van Zijll Langhout, G. J. F. Stijntjes, and H. I. Waterman 263

Refining Methods for Maximizing Middle Distillate Production. L. S. Bonnell 273

Continuously Recording Oxidation Apparatus for Hydrocarbon Oils. D. G. Childs 283

Evaluation of Greases for Ball- and Roller-bearings at Low Temperatures. J. W. Pearson 290

Evaporation Losses from Petrol Storage Tanks in the United Kingdom—A Practical Survey. E. H. Walker, R. M. Eltringham, and A. Puttick 297

Revised Method, IP 71T, for the Determination of Kinematic Viscosity in CGS Units 326

Determination of Magneto-optical Rotation of Hydrocarbons in the Ultra-violet Region

Part I. Anomalous Dispersion in the Region of Absorption. F. H. Garner, O.B.E., C. W. Nutt, and A. Labbauf 329

Part II. Magneto-optical Analysis of Hydrocarbon Mixtures. A. Labbauf, C. W. Nutt, and F. H. Garner, O.B.E. 336

Polymerization of Propene with a Silicotungstic Acid Catalyst. J. J. Verstappen and H. I. Waterman . 343

The Co-ordinating Research Council. M. K. McLeod 353

Current Programme of Co-ordinating Research Council. T. B. Rendel and W. G. Ainsley 362

What CRC Means to the Petroleum Industry. W. J. Sweeney 372

What CRC Means to the Automotive Industry. E. S. Macpherson 373

Engine Tests of Lubricants. Special Meeting of IP Panel 383
